

## ENVIRONMENTAL POLICY STATEMENT

Derek Gee Installations recognizes that all businesses have the potential to impact negatively on the environment. We are therefore committed to managing our operations, products and services in an environmentally responsible manner.

Through this commitment, our organisation will strive to:

- Align our environmental goals with those of our clients-as a basis to strive (where practicable) to help our clients realise their own environmental goals
- Prevent pollution
- Appropriately store and use chemical and fuels to minimise environmental risk
- Appropriately manage our overall environmental impacts
- Meet and where possible exceed all environmental legislation, regulations, and other requirements to which our organisation subscribes
- Strive to undertake our operations using minimum impact technologies
- Improve the environmental awareness of people working for, or on behalf of our organisation, (i.e. employees, contractors and sub-contractors
- Obtain only positive feedback regarding our business operations/ management program, regarding our environmental performance; and
- Used the waste management hierarchy to improve our resource use efficiency and maximise and improve our recycling performance.
- Provide a work environment free from discrimination, bullying and harassment.

All persons employed by Derek Gee Installations are required to acknowledge their responsibility for sound environmental practices and in conjunction with the above policy provide a positive contribution to company's environmental management program.

This Policy is communicated to people working for or on behalf of Derek Gee Installations through staff and contractor inductions. This Policy is available to the public on our website, [www.dgi.net.au](http://www.dgi.net.au)
